

QA Engineer (Innsbruck/Austria)

This is a different adventure as the ones you already know – become part of it!

Less than 2 years ago we started with a vision: Making sports more convenient, safer and pleasurable for fellow sport enthusiasts. After spending a year in Sweden to accelerate development we finally moved to Innsbruck, the heart of the alps. PowUnity's first product NeverLose exceeded all expectations and so it's time for the venture to take the next step: Hiring more A-players who are excited about building great products and a new brand together.

We are currently hiring for the position of Software Test Engineer. This opportunity will afford a lot of exposure to a variety of technological components.

As a Software Test Engineer your role will be pivotal to the development of our quality assurance processes in addition to working on a new and exciting product.

What you will do

- Work directly with developers to identify and correct software defects
- Testing our hybrid mobile app using Javascript test frameworks
- Testing hardware devices connected via Bluetooth Low Energy
- Development of unit and integration tests
- Planning, design and implementation of a CI test environment for mobile apps
- Work with fellow engineers and managers on furthering the QA process

What you've done (Requirements)

- M.A. or B.A .in computer science or equivalent
- Experience with UI testing using Javascript frameworks
- Experience with unit and integration testing of Javascript apps or embedded C code
- Experience in QA for software applications, preferably mobile applications
- Good analytical and problem solving skills
- Basic knowledge of Bluetooth Low Energy is a plus

What we like:

- Visionary and out of the box thinking.
- Go skiing together.
- Brainstorming sessions on the mountain.
- Fredags Öl.
- Saying we instead of I.

- Doing something no one else thought we are capable of.
- Being challenged.

Why joining us?

Because you will get the chance to show your real potential when you are with us. The current team is perfect proof for that. The excitement of building something from scratch and the ability to actively influence where the venture is heading unfolds their capacities to its greatest extend. By joining us now you get the possibility to actively influence the future of PowUnity. Of course we also have to test our own products, on our skis and snowboards, in the nature and as friends. And yes, Innsbruck is a great place to do so!

You think there is a fit?

Then shoot us an email at: neverlose@powunity.com including your CV and a letter of motivation (max. 1 page).
