

Team Lead Software and Firmware Developer (Innsbruck/Austria)

This is a different adventure as the ones you already know – become part of it!

Less than 2 years ago we started with a vision: Making sports more convenient, safer and pleasurable for fellow sport enthusiasts. After spending a year in Sweden to accelerate development we finally moved to Innsbruck, the heart of the alps. PowUnitys' first product NeverLose exceeded all expectations and so it's time for the venture to take the next step: Hiring more A-players who are exited about building great products and a new brand together.

The ideal candidate for this position is skilled in writing back-end as well as front-end code that is as responsive, fast, simple and cross-browser compatible as possible. S/He is a creative thinker with the ability to troubleshoot issues quickly and effectively. The successful candidate must have excellent interpersonal skills, possess excellent written and verbal communication skills. S/He will institute and adhere to best practices, be a strong team player as well as a proactive individual contributor.

What you will do

In this role, you will be responsible for leading a team of up to 5 firmware and app developers. You will be working extremely closely with our hardware and management team to help craft our NeverLose devices.

- Lead and manage a team of developers
- Develop the core product of the company
- Assist in defining and reviewing requirements and use cases for NeverLose
- Build and test the application and technical architecture components
- Work with other developers, designers, and hardware engineers
- Participate in code reviews

What you've done (Requirements)

- A 3+ years experience of development in all of the following technologies: HTML5, CSS, JavaScript, C/C++
- Strong professional experience with software architecture
- Have first-hand understanding of Agile development methodologies (e.g., as a Scrum Master) as well as formalising and implementing development and release processes
- Experience with Javascript MVC frameworks (e.g., AngularJS, Backbone, Ember etc.)
- Experience with embedded C/C++ development
- Experience with mobile native development for at least one platform
- Experience with backend development (e.g., NodeJS)
- Experience with non-relational databases (e.g., MongoDB, CouchDB, Cassandra, etc.)

What we like:

- Visionary and out of the box thinking.
- Go skiing together.
- Brainstorming sessions on the mountain.
- Fredags Öl.
- Saying we instead of I.
- Doing something no one else thought we are capable of.
- Being challenged.

Why joining us?

Because you will get the chance to show your real potential when you are with us. The current team is perfect proof for that. The excitement of building something from scratch and the ability to actively influence where the venture is heading unfolds their capacities to its greatest extend. By joining us now you get the possibility to actively influence the future of PowUnity. Of course we also have to test our own products, on our skis and snowboards, in the nature and as friends. And yes, Innsbruck is a great place to do so!

You think there is a fit?

Then shoot us an email at: neverlose@powunity.com
including your CV and a letter of motivation (max. 1 page).
